

Build your environment

In 60 years, DAGARD have built its expansion adapting his historical concept to the various markets needs.

European leader in modular cold rooms, French leader in isothermal construction for food industry, DAGARD is also the leading European provider of cGMP modular high-end clean rooms envelopes.

DAGARD's distributor networks and customer loyalty are vital components under-pinning the company's successful development. Our expertise and know-how concern our products, awareness of customer needs and the quality of customer service on a daily basis.

A workforce of more than 500 people devotes themselves to the design, manufacture, marketing and installation of our products. Close cross-department collaboration within our compagny, ensure a personalized follow-up of our customers and the success of their projects.

50 technicians and engineers are specialized in research and design. They monitor projects before and after delivery.

The competitive edge of the compagny is sharpened by our ongoing technological progress, our in-service training and rigorous quality assurance procedures.

We are present in more than 60 countries through our numerous partners.

Our western Europe-wide customer reference list and our expertise have opened the doors of other continents to us including Africa and Asia where our expertise is sought.

Our dynamic marketing strategy gives us a foothold in eastern European states, the nations of north America and latine America.

European leader, Dagard is positioned as the strategic partner for his customers. His size and operation ability on site place Dagard as an inescapable actor for the project achievement.

Three complementary fields

Clean rooms

The lines of products offered are from the outset designed to address the constraints of industries where the bacteriological or particulate contamination risk factor must be an ongoing priority.

Interior walls, ceilings, doors and glazings meet the requirement levels of premises in line with their specific class. Erection teams used to work in the special conditions imposed by our customers support projects up to the final performance audit stage.

Ultra-Clean line
Controlled Environment line
High-Tech line

Isothermal Constructions

For customers involved in food industries, the processing of raw materials, food processing, storage and logistic, Dagard delivers turnkey installations incorporating all necessary partitions between floor and roof, interior walls, ceilings, doors, glazing and specific products.

The overall unit with its uniform lines and aesthetic appeal meets all conditions demanded by standards with sanitary and fire engineering requirements.
